

Hiking App User Manual

Welcome to the Hiking App!

This app is designed to enhance your hiking experience by allowing you to track current hikes, view past hikes, and manage your hiking activities with ease.

Getting Started

1. Open the app after installation:
2. Navigation:
 - a. Current Hike
 - b. Past Hikes

Features & How to Use

- Current Hike: This tab allows you to view and manage your current hiking activity.
 - Adding a New Hike Location:
 - Tap the "Add Hike" button.
 - Enter the location in the dialog box that appears.
 - Confirm the entry to add the location to your current hike.
 - Navigation Through Hike:
 - Use the "Prev" and "Next" buttons to navigate through different locations within your current hike.
 - Saving Hike Data:
 - Press the "Save Current Hike" button to save the data about your current hike.
- Past Hikes: This tab displays a list of your past hikes.
 - Viewing Past Hikes:
 - Scroll through the list to view your past hikes.
 - Selecting a Hike for Deletion:
 - Tap on a hike to select it. The selected hike will be highlighted.
 - Removing a Hike:
 - After selecting a hike, press the "Remove Hike" button to delete it from your past hikes.
 - Loading and Saving Hikes:
 - Use the "Load From Storage" button to retrieve saved hikes from storage.
 - Use the "Save To Storage" button to save the current list of hikes to storage.

Additional Information

- Data Storage:

- Your hike data is securely stored in the app's local storage, ensuring quick access and reliability.
- Location Data:
 - For adding new locations in your current hike, the app may require access to GPS or manual location entry.
